

It's almost time to get cooking! But first, a few setup steps.

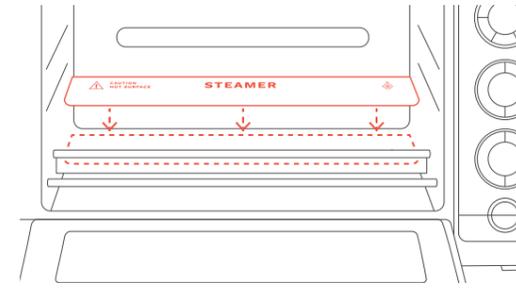

1

Remove packaging and silica packs from your oven and its accessories. Remove any plastic from the crumb tray found on the bottom of your oven's interior, then slide the crumb tray back into place. Always have the crumb tray inserted when using your oven.

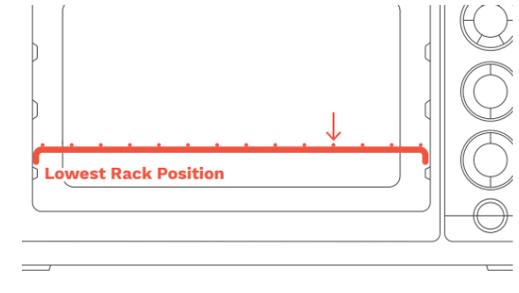

2

Plug your oven directly into a dedicated GFCI outlet. Be sure that nothing else is plugged into that outlet. Do not plug your oven into an extension cord or power strip.

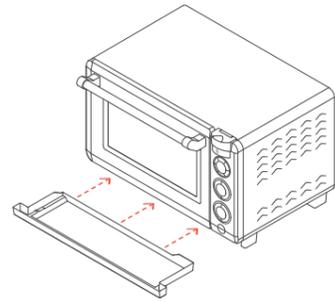

3

Cover the steamer with the (c) steamer cover. The steamer is stainless steel and located inside your oven toward the back wall. The steamer cover should slide downward into place with the text "STEAMER" facing you.

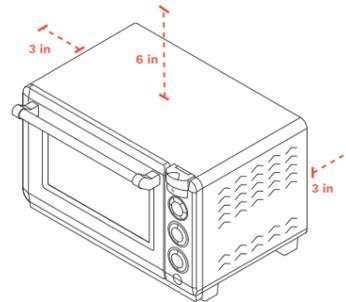

4

Open your oven door and slide the (d) oven rack into the lowest rack position. Make sure the rack's curved edges are facing down. All Tovala Meals cook with the rack in this lowest position.

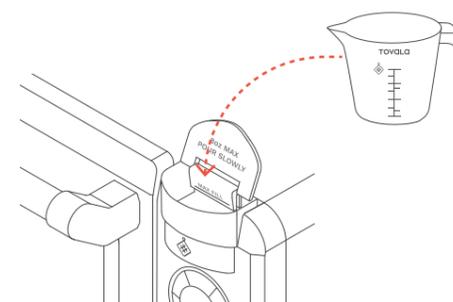

5

Slide the (a) drain tray into the front of your oven underneath your oven door. The drain tray collects any excess water when your oven cooks with steam. Always have the drain tray inserted when using your oven.

6

Place your oven on a level and sturdy surface. Be sure to leave at least 3 inches between the back and sides of your oven and any surface, and 6 inches between the top of your oven and any surface. The oven's exterior gets hot during use. Please take necessary precautions with children and pets.

7

Fill the (e) measuring cup with 8 oz of cool, filtered water. Open the lid on the water reservoir and pour directly into it. Fill the water reservoir until the "Add Water" message disappears from your oven's display.

Connect your oven to WiFi

Your oven requires WiFi to scan, cook Tovala Meals, and communicate with the Tovala App. To connect your oven to WiFi:

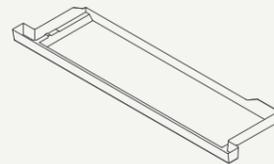

1. Download Tovala's "Tovala" App for iPhone®, iPod touch®, and Android™. Find it by searching "Tovala" in the App Store® and Google Play®.
2. Log into your Tovala account or create an account.
3. Follow the app's step-by-step oven setup instructions.

TOVALA

What's in the box?

a. DRAIN TRAY

This slides into the front of your oven underneath the oven door. It collects any excess water when your oven cooks with steam. Check it and empty it periodically.

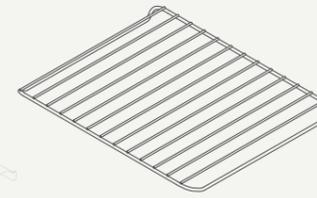

b. CRUMB TRAY

This slides into the very bottom of your oven's interior and ensures easy cleaning.

c. STEAMER COVER

This covers your oven's steamer, which produces the steam your oven uses to cook.

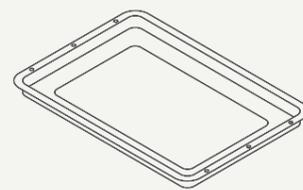

d. OVEN RACK

This goes inside your oven in the lowest rack position. Tovala Meals should always be cooked with the rack in the lowest position.

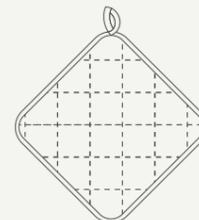

e. MEASURING CUP

Use this to fill your oven's water reservoir when your oven displays an "Add Water" message. Fill the water reservoir until the "Add Water" message disappears from your oven's display.

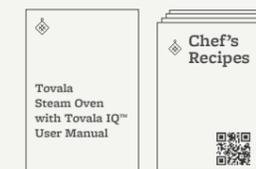

f. SHEET TRAY

Perfect for cooking anything you like. During use, it should sit directly on top of the oven rack. This is NOT needed for cooking Tovala Meals.

g. HOT PAD

Perfect for resting hot trays and pans on before serving.

i. USER MANUAL & RECIPE CARDS

Use the user manual to learn more about safety guidelines, oven controls, and cleaning and maintenance. Use the recipe cards to get started cooking from scratch with your oven.
